# RECYCLING REWARDS

Otto will purchase your old, broken, or undesirable containers, regardless of the manufacturer, and make them into new carts.

## Benefits

- Reduce your organization's carbon footprint
- Gain an additional revenue source
- More efficiency with a clean, organized yard
- Lowered landfill tipping costs
- Continuing your container's life cycle

CONTINUING YOUR CONTAINER'S LIFE CYCLE

**BECOME MORE SUSTAINABLE, AND MAKE MONEY DOING IT!**

Otto collects old, broken and unwanted plastic containers, decreasing the overall carbon footprint of the container manufacturing process.

Otto used over 2M pounds of cart regrind and post-industrial, re-processed polypropylene in our carts last year.

Our expert reclaim team will coordinate the logistics for you; prepare the containers for pick up from your location.

We grind the carts into flake material pellets.

Otto creates new containers with a percentage of the recycled content during the manufacturing process.

## Recycling Rewards

Otto offers credit towards future purchases or check payments. Credits are usually higher than payments and can be used on new containers, parts, or applied to outstanding invoices.

The primary factors that determine how much we pay for your retired containers are freight and weight.

**High Freight + Low Weight = Low Value**

**Low Freight + High Weight = High Value**
